The amount available under these facilities is re-determined at least twice a year and is primarily based on the Company’s oil and gas reserves, the lending institution’s forecast commodity prices, the current economic environment and other factors as determined by the syndicate of lending institutions (the “Borrowing Base”). If the total advances made under the credit facilities are greater than the re-determined Borrowing Base, the Company has 60 days to repay any shortfall. The facility lasts for a 183-day period and will be subject to its next 364-day extension by November 26, 2022. If not extended by November 26, 2022, the Facility will cease to revolve and all outstanding balances will become repayable one year from that date.

The Company is subject to a single financial covenant requiring an adjusted working capital ratio above 1:1 (current assets plus the undrawn availability under the revolving facility, divided by the current liabilities less the drawn portion of the revolving facility and excluding unrealized commodity contracts). The Company was in compliance with this covenant as September 30, 2022 and December 31, 2021. The facility is secured by a general security agreement over all assets of the Company. c. Market risk

The Company has exposure to the following market risks:

i. Interest rate risk

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. The Company is exposed to interest rate fluctuations on its bank debt which bears interest at a floating rate and to mitigate this risk, the Company has entered into interest rate contracts. For the nine months ended September 30, 2022, if interest rates had been 1% lower with all other variables held constant, net income would have been $1,285 (2021 - $1,473) higher, due to lower interest expense. An equal and opposite impact would have occurred had interest rates been higher by the same amount. The Company had no interest rate contracts in place as at September 30, 2022.

ii. Currency risk

Foreign currency exchange rate risk is the risk that the fair value or future cash flows will fluctuate as a result of changes in foreign exchange rates. All of the Company's petroleum and natural gas sales are denominated in Canadian dollars, however, the underlying market prices in Canada for petroleum and natural gas are impacted by changes in the exchange rate between the Canadian and United States dollar. The sensitivity of the fair value of a 10% change in foreign exchange rates would have an immaterial impact the consolidated statements of income and comprehensive income.

iii. Commodity price risk

Commodity price risk is the risk that the fair value or future cash flows will fluctuate as a result of changes in commodity prices.

As at September 30, 2022, the Company was committed to the following commodity price risk contracts:

Year	Volume	Term	Reference	Type	Strike Price		Fair Value
Natural Gas							
2022	2,500 GJ/d	Apr - Oct	AECO - Monthly 5A	Swap	CAD $4.49/GJ	$	22
2022	5,000 GJ/d	Apr - Oct	AECO - Monthly 7A	Swap	CAD $4.50/GJ	$	(9)
Propane							
2022	200 bbl/d	Jan to Dec	Conway - C3 to Mont Belvieu C3	Basis Swap	Plus USD 0.0025/Gallon	$	(24)
Total						**$**	**(11)**

As the Company had a limited number of derivatives in place as at September 30, 2022, the sensitivity of the fair value of a 10% volatility in commodity prices would have an immaterial impact on unrealized gains (losses) reported in the consolidated statements of income and comprehensive income.

d. Fair value of financial instruments

The following table summarizes the carrying value and fair value of the Company's risk management assets and liabilities.

d. Fair value of financial instruments (continued)

The fair values of financial instruments have been determined by various valuation methods as defined below:

- Level 1: fair value is based on quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: fair value is based on inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and,
- Level 3: fair value is based on inputs for the asset or liability that are not based on observable market data (unobservable inputs).

There were no transfers between levels in the fair value hierarchy during the nine months ended September 30, 2022.

11. Capital disclosures

The Company considers its capital structure to include shareholders equity and debt:

Shareholders' equity	$	**448,140**	$	364,959
Bank debt	$	**153,859**	$	195,422

The Company monitors capital based on annual cash from operations before changes in non-cash working capital and capital expenditure budgets, which are updated as necessary and are reviewed and periodically approved by the Board of Directors.

13. Revenue

At September 30, 2022, receivables from contracts with customers, which are included in trade accounts receivable, were $27,022 (December 31, 2021 – $16,620).

14. Contingency

In the normal conduct of operations, there are other pending claims by and against the Company. Litigation is subject to many uncertainties, and the outcome of individual matters is not predictable with assurance. In the opinion of management, based on the advice and information provided by its legal counsel, the final determination of these other litigations will not materially affect the Company's financial position or results of operations.
