The Company is exposed to interest rate fluctuations on its bank debt which bears interest at a floating rate and to mitigate this risk, the Company may enter into interest rate contracts. For the six months ended June 30, 2024, if interest rates had been 1% lower with all other variables held constant, net income would have been $594 (six months ended June 30, 2023 – $628) higher, due to lower interest expense. An equal and opposite impact would have occurred had interest rates been higher by the same amount. The Company had no interest rate contracts in place as at June 30, 2024.

ii. Currency risk

Foreign currency exchange rate risk is the risk that the fair value or future cash flows will fluctuate as a result of changes in foreign exchange rates. All of the Company's petroleum and natural gas sales are denominated in Canadian dollars, however, the underlying market prices in Canada for petroleum and natural gas are impacted by changes in the exchange rate between the Canadian and United States dollar. The sensitivity of the fair value of a 10% change in foreign exchange rates would have an immaterial impact on the condensed interim consolidated statements of income and comprehensive income.

iii. Commodity price risk

Commodity price risk is the risk that the fair value or future cash flows will fluctuate as a result of changes in commodity prices.

As at June 30, 2024, the Company was committed to the following commodity price risk contracts:

Year	*Volume*		*Term*	*Reference*	*Type*	*Strike Price*	*Fair Value*

2024	3,000	GJ/d	Jul 24 - Dec 24	AECO - 7A	Put	CAD $1.50	$ 194

2024	450	bbl/d	Oct 24	WTI - USD	Put	USD - $50.00	(6)
2024	450	bbl/d	Nov 24	WTI - USD	Put	USD - $50.00	(4)
2024	450	bbl/d	Dec 24	WTI - USD	Collar	USD $50.00 - 100.60 /bbl	(5)
2025	1,650	bbl/d	Jan 25	WTI - USD	Collar	USD $50.00 - 98.50 /bbl	(23)
Total							**$ (38)**

As the Company had a limited value of derivatives in place as at June 30, 2024, the sensitivity of the fair value of a 10% volatility in commodity prices would have an immaterial impact on unrealized gains (losses) reported in the condensed interim consolidated statements of income and comprehensive income.

11. Capital disclosures

The Company's objective when managing capital is to maintain a flexible capital structure which will allow it to execute its capital expenditure program, which includes expenditures in oil and gas activities which may or may not be successful. Therefore, the Company monitors the level of risk incurred in its capital expenditures to balance the proportion of debt and equity in its capital structure.

Shareholders' equity	**$ 559,483**	$ 536,598

At June 30, 2024 and December 31, 2023, the Company's capital structure was subject to the banking covenant disclosed in note 3. No changes were made to the capital policy in 2024.

14. Contingency

In the normal conduct of operations, there are pending claims by and against the Company. Litigation is subject to many uncertainties, and the outcome of individual matters is not predictable with assurance. In the opinion of management, based on the advice and information provided by its legal counsel, the final determination of these other litigations will not materially affect the Company's financial position or results of operations.
